
Sorenson Squeeze 4.1

Compression Suite

Includes all Sorenson Media® Pro codecs and the new Sorenson AVC™ Pro codec

Sorenson Squeeze 4.1 Compression Suite is the first full-featured compression application to incorporate High Definition (HD) encoding for a variety of video formats including MPEG-1, MPEG-2, MPEG-4, QuickTime®, RealMedia™ and Windows Media.™ * Sorenson Media has also added the Sorenson AVC Pro codec (also known as H.264) to the Sorenson Squeeze 4.1 Compression Suite. This codec offers unparalleled encoding efficiency by creating the highest-quality video at roughly 70 percent the data rate of the standard MPEG-4 codec.

Output Formats

macromedia FLASH MX

real

Windows Media™ Compatible *

MPEG 1

MPEG 2

MPEG 4

Easily Compress High-Quality Video

Compressing and sharing your videos on CDs and DVDs or over the Web just got even easier with the Sorenson Squeeze 4.1 Compression Suite. Simply take your edited, uncompressed video from popular tools such as Avid Xpress® DV, Apple Final Cut Pro®, Apple Final Cut Xpress® and Adobe Premiere® or bring your digital video from your source straight into Squeeze 4.1. Encoding video is as easy as selecting an intelligent preset for your intended audience and clicking the "Squeeze It" button.

Leverage New Time-Saving Features

Built for all of the Sorenson Media professional codecs and popular third-party codecs, Squeeze 4.1 enables you to easily deliver a variety of output formats, sizes, and bit rates. The new NLE shortcut keys mean you can do more in less time. Squeeze 4.1 also comes with improved intelligent presets, which can be customized and saved for later projects. You can even use the new in/out preview markers to preview a segment of video before you encode the entire video.

With Squeeze 4.1 you can also customize the interface to fit your workflow. Simply detach and resize the preview window for full-screen previews, or move it to a second monitor—Squeeze 4.1 remembers where you drag and drop the windows. The new video zoom tool helps you to achieve pixel-perfect cropping, while improved filter capabilities eliminate blotches around black and white restored pixels.

Additionally, Squeeze 4.1 offers many advanced features that experienced multimedia producers demand such as batch processing with the capability to apply filter and compression settings at the job, source, or output level. This means you can apply different settings to multiple videos within a batch—locally or globally. Now, with batch processing, there's no need to stop compression in order to edit or add more videos to the batch, and you can edit settings for jobs further down in the batch while another job is compressing.

* Users may purchase the Telestream plug-in for the Sorenson Squeeze 4.1 Compression Suite for the Mac allowing video encoding of Windows Media 9 directly on the Mac.

Video compression is as easy as 1, 2, 3, 4:

1. Open an uncompressed video file
2. Select an output format
3. Select an intelligent preset
4. Press "Squeeze It"

New filter preview slider for before and after views

New zoom tool for pixel perfect cropping

New customizable/detachable interface and dynamic preview window

Improved filter presets

Improved Intellegent presets, which can be modified to create custom settings

Improved workflow and batch processing at **job,** **source,** and **output** levels

Key Features of Sorenson Squeeze 4.1 Compression Suite

- High Definition (HD) encoding options available for AVC/H.264, MPEG-1, MPEG-2, MPEG-4, QuickTime, and RealMedia
- Chapter markers for DVD
- Support for AVC encoding (H.264)
- Batch processing at job, source, and output levels
- Detachable and resizable preview window
- Video zoom tool for pixel-perfect cropping
- In/out preview markers
- Multi-Bit-Rate file creation for RealMedia
- Ability to save audio and video filter settings
- Ability to save a project
- Filter preview slider
- Modeless filter dialog
- Filters
  - Audio normalization
  - Contrast/brightness
  - Deinterlacing
  - Fade in/out
  - Telecine removal
  - Video noise reduction
  - White/black restore with smoothness slider
- In/out trim points
- Multiple Watch Folders with multiple output options
- Improved intelligent presets
- Optimized presets for streaming, progressive download, and local delivery (with various data rates for each preset)
- Duplicate source button
- Customizable interface layout
- Integrated links for Flash (SWF) output
- Playback action controls for Flash (SWF) output
- Player templates for Flash (SWF) output
- Stitching for large Flash (SWF) files
- Standard NLE shortcut keys
- Ability to constrain output file sizes
- Audio import
- DV capture
- One-Pass and Two-Pass VBR compression
- Tools for MPEG-4 (Visual Simple Profile and Visual Advanced Simple Profile)
- Optional tasks dialog
- Send to DVD Studio Pro
- Transport streams for HDV and DVHS

System Requirements

- Power PC with G4 processor or greater
- Mac OS 10.2 or later
- 128 MB of RAM
- 90 MB available hard disk space
- QuickTime® 6.5.1 or later

Encoders

Video Encoders:

- QuickTime compatible codecs
- MPEG-1
- MPEG-2
- RealVideo 8, 9 and 10
- Sorenson AVC™ Pro (for MPEG-4 AVC encoding)
- Sorenson MPEG-4™ Pro (for Visual Simple Profile and Visual Advanced Simple Profile encoding)
- Sorenson Spark™ Pro (for Flash MX and Flash MX Professional encoding)
- Sorenson Video® 3.1 Pro (for QuickTime encoding)

Audio Encoders:

- aac Plus Audio
- ACELP RealAudio
- ADPCM
- QuickTime compatible codecs
- Cook RealAudio®
- Fraunhofer AAC
- Fraunhofer MP3
- Qdesign Music Codec 2
- QualComm PureVoice™
- Uncompressed Audio
- MPEG Layer 1
- MPEG Layer 2
- MPEG PCM

Formats

Input Formats:

- AAC
- AIFF
- AVI
- DV
- MOV
- MP3
- MPEG-1
- MPEG-4
- WAV
- WMA*
- WMV*

Output Formats:

- AAC
- aac Plus
- AIFF
- DV
- DVD
- FLV 1.1
- HD for MP1, MP2, MP4 and RealMedia
- MOV
- MP3
- MPG (MP1 and MP2)
- MP4
- MP4 AVC (H.264)
- SVCD
- SWF
- VCD
- WAV
- WMA*
- WMV*

* Must have the Telestream plug-in.
